

Care & Maintenance

- Always carry your mattress on its side, you should not attempt to carry the mattress by yourself
- Handles (where fitted) are only for positioning the mattress and not for lifting or carrying
- Do not fold your mattress under any circumstances, it will damage the edge support wire - gently flex the mattress when going through doorways
- Don't remove the tag located at the end of your mattress, this contains details important to your warranty
- Don't allow anyone to jump on your mattress, abuse is not covered within this warranty
- Dispose of plastic bags immediately (these bags are polyethylene and are recyclable)
- Make sure children never use the bags to play with (they have no air vents and could lead to suffocation)
- Follow the leg assembly instructions for the foundation:
 - 1 Turn the foundation or base of bed upside down and insert pintle into the hole and turn clockwise; repeat for all legs
 - 2 Tighten by hand until legs are firmly in place
 - 3 Turn foundation back and re-tighten legs as securely as possible by hand; check and realign as necessary every three months
- Important: It is the purchaser's responsibility to tighten the legs to ensure that the bed is set up as intended - this warranty is void if this is not performed as suggested
- Keep your mattress clean, the correct fitting mattress protector is recommended
- Keep your mattress dry - you should protect it from water and other fluids (a mattress protector may be useful)
- To ensure the optimum performance of your mattress, we strongly recommend the use of an appropriate Sealy foundation, which has been designed to work in conjunction with your mattress to deliver the best level of support

Slat or Platform Beds

The use of slat foundations and other bedding furniture may result in damage being caused to your mattress; Sealy's warranty covers manufacturing faults as defined in this document, but may not cover damage caused by inappropriate foundation furniture.

Fabric

DO

- Protect from direct sunlight, turn and rotate your mattress regularly
- Vacuum regularly using a low suction
- Treat spills and stains as soon as possible, gently scrape away any soil or mop away liquid from the surface of the fabric; use a suitable upholstery cleaner and follow according to the manufacturers directions, dry in the shade away from direct heat and allow to dry thoroughly

DON'T

- Saturate fabric with water or other cleaning liquid
- Use dishwashing or laundry detergent
- Scrub with a stiff brush

Dry cleaning chemicals may cause damage - refer to the care instructions on the tag (located on the border of your mattress and base) for complete care instructions.

Safety

Don't ever place this product near open flames or expose it to fire. The mattress is not flame proof and can ignite or burn if exposed to an open flame or fire. When ignited, some bedding material can burn rapidly and emit smoke and hazardous gases. We also recommend that you do not smoke in bed.

To ensure your sleep comfort, make sure your bed and bedroom are aired regularly and avoid heating your room with an LPG heater. A by-product of LPG heating is moisture, which can lead to dampness in tightly closed rooms.

Finally

Be sure to retire your old mattress - your old bedding is unlikely to provide the comfort and support required. We recommend you do not pass on old bedding to others.

Your Warranty

Sealy Warranty

Sealy New Zealand is dedicated to manufacturing quality products, so you can experience the benefits of a great night's sleep. Sealy is committed to its obligations under the Consumer Guarantees Act 1993 and handcrafts its products to the highest standards. Though every attention to detail is undertaken, in very occasional situations, manufacturing faults can occur. Should this happen, please contact the store where you purchased your sleepset from. If you are unable to reach the store, please contact Sealy.

If a manufacturing fault is identified, Sealy maintains spare parts and repair facilities and will replace or repair the defective mattress and/or foundation within a reasonable period of time, as limited by this warranty. In order for this warranty to be valid, you must be the original purchaser from an authorised dealer in New Zealand and you must provide a copy of the original store receipt (or other suitable proof), place of purchase and purchase price.

We recommend you allow up to 30 days for your body to adjust to the feel and support of your new sleepset.

Commitment

This warranty is valid for a 10 year period and begins on the day of purchase. If your sleepset is repaired or replaced, there will be no extensions to the original warranty period.

This Warranty Covers

- Mattress**
- Coils or wires that are loose or broken
 - Coils or wires that protrude or tear through the fabric
- Foundation**
- Splitting of the wood frame
 - Loose or broken foundation wire
 - Unstapling of modules
 - Compression of modules
 - Leg and castor failure

This Warranty does not Cover

- Mattress fabric (including stains, soiling, burns or pilling)
- Normal body indentations
- Comfort preference
- Handles (where fitted) - these should be used to position the mattress and are not designed to carry the full weight of the mattress
- Border wires (which run along the perimeter of the mattress and foundation) which are bent due to moving or bending the sleepset
- Bed sold 'as is'
- Bed height
- Sheet fit
- Mattress damage due to an unsuitable foundation (a mattress is designed for optimum performance when used in conjunction with a matching foundation as part of a total sleepset)
- Replacement of non-defective componentary
- New bed smell/odour
- Damage due to abuse

Availability of Identical Materials

If identical materials are not available at the time of repair, Sealy reserves the manufacturer's right to substitute materials of equal quality. Identical fabrics can not be guaranteed, however the closest available match will be made.

Extending the Comfort & Support Life

Your new Sealy mattress has one sleep surface, which means you do not have to flip your mattress. Further, your mattress has StayTrue® upholstery padding, which increases longevity and performance of your mattress. Body indentations are a normal occurrence and indicate that the upholstery layers are conforming to your body's individual contours. To help minimise body impressions and to add to the enjoyment of your bed feel, we recommend you rotate your mattress to extend the life of your sleepset.

How Often to Rotate your Mattress

- Every two weeks in the first three months
- Once every three months there-after

Rotating Instructions

- 1 Grasp the mattress corners and spin the mattress clockwise 180 degrees, align with the base
- 2 Your new mattress is now rotated end to end
- 3 Handles (if fitted) should be used to position the mattress, not to lift or carry the mattress

Warning

You should not attempt to rotate the mattress by yourself - this may cause personal injury or damage to your mattress.

Sealy New Zealand reserves the right to refuse a warranty when the product is found on inspection to be in an unsanitary condition or when the product failure is due to causes other than defective workmanship or material.
